Mechanical Engineering studies began in 1970/71 in Montenegro, at the Mechanical Engineering Department at the Engineering Faculty.

In 1978, this department was transformed into an independent higher-education institution - Faculty of Mechanical Engineering.

Today, Faculty of Mechanical Engineering educates professionals of all levels of professional and scientific competence from engineers, through specialists and masters of science to Ph.Ds in the field of mechanical engineering.

Students can choose among six departments and several courses of studies.

1. Production Mechanical Engineering

- Production Technology
- Flexible Automatization
- Industrial Engineering

2. Mechanization

- Motors and Motor Vehicles
- Transport Machines and Metal Constructions

3. Applied Mechanics and Constructing

- Mechanics of Machines and Constructions
- Designing

4. Power Supply

- Hydro-Power Supply
- Thermal Power Supply
- Thermal Technics.

5. Road transport

6. Wood processing

Teaching staff:

Professors - 28

Assistants - 9

Laboratory assistants - 2

Technical staff - 5,

Teaching staff has a very intensive collaboration with many world wide famous university institutions: Lomonosov, Stanford, Birmingham, Merilend, Ahen, Karlsruhe, Viskonsin, Lublin, Košice, Kijev, Leoben, Dallas.

Computer room

Laboratory for Metal forming

The Faculty does research work and designs new production solutions, examines and attests engines, and elements of industrial plants and offers other services to economic and non-economic organizations.

The University of Montenegro cooperates with UNESCO, Council of Europe, American Councils, WUS-Austria, British Council, DAAD...

Since 2002 a number of projects are being realized at the University of Montenegro within the European Union programmes: TEMPUS, SOCRATES, ERASMUS-MUNDUS.

Joint European Projects (JEP)

JEP 16050 – Developing Quality Assurance in Higher Education, prof. dr Radomir Vukasojević, University of Montenegro, 2001.

total budget: 112 460 euro

Thank you for your attention!
